

OVHALKAR BHAVANESH SAMBHAJI

Pune, Maharashtra

+91 7498579851 — bsovhalkar@gmail.com

LinkedIn — GitHub — LeetCode

Career Objective

Computer Engineering undergraduate with strong foundations in **Java, Data Structures and Algorithms, Object-Oriented Programming, and SQL**. Passionate about software engineering, analytical problem-solving, and creating efficient applications using solid computer science principles.

Education

JSPM's Rajarshi Shahu College of Engineering (RSCOE), Pune
Engineering

2023 – 2027 B.Tech – Computer
CGPA: **9.10** HSC (12th): 72.67

Technical Skills

Programming Languages: Java, C++, Python

Object-Oriented Programming: OOP Principles, Encapsulation, Inheritance, Polymorphism, Abstraction, Exception Handling, Multithreading

Java Fundamentals: Collections Framework (List, Set, Map, HashMap), String Manipulation

Data Structures & Algorithms: Arrays, Strings, Linked Lists, Stacks, Queues, Hashing, Trees (Binary Tree, BST), Heaps, Graphs, Sorting, Searching, Recursion, Dynamic Programming, Time & Space Complexity Analysis

Databases: SQL, MySQL, MongoDB, Joins, Subqueries, Normalization, Transactions, ACID Properties

Core Computer Science: DBMS, Operating Systems, Computer Networks, Software Development Life Cycle (SDLC)

Machine Learning (Secondary): Exploratory Data Analysis (EDA), Feature Engineering, Model Training & Evaluation, XGBoost, Random Forest, Scikit-learn, Pandas, NumPy, Matplotlib

Tools: Git, GitHub, Linux, VS Code

Projects

Campus Recruitment & Placement Management System

Java, Spring Boot, MySQL, Git

- Built a placement management system to streamline student registrations, company applications, and recruitment tracking.
- Implemented eligibility-based student shortlisting using academic and skill-oriented criteria.
- Designed and maintained a MySQL database to efficiently store student, company, and placement records.
- Created RESTful APIs using Spring Boot and applied Object-Oriented Programming principles to build a scalable and maintainable application.

Phishing Website Detection System

Python, XGBoost, Streamlit

- Built a machine learning model to identify phishing websites using the UCI Phishing Dataset.
- Conducted data preprocessing, feature engineering, and model optimization using XGBoost.
- Assessed model performance using classification metrics and enhanced prediction accuracy.
- Created a Streamlit-based interface for real-time phishing website prediction.

Library Management System

Java

- Created a Java-based application to manage books, users, and library transactions.
- Implemented book issuance, return, and search functionalities using the Collections Framework.
- Applied Object-Oriented Programming concepts to develop a modular and maintainable system.

Achievements & Certifications

- Solved **500+** **Data Structures & Algorithms problems** on LeetCode, strengthening analytical and coding abilities.
- **NPTEL Ethical Hacking** – Silver Certificate.
- **Copyright Published (2025): GREY BOX TESTING, AI IN CYBER SECURITY.**

Relevant Coursework

Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming
